Certificate Course offered by Sahyadri Health Care and Diagnostic Centre

on

Healthcare Management to BBA/B.Com/BCA/M.Com Students – AY – 2019-20

The healthcare industry has shifted from volume-based care to value-based care: More than ever, healthcare organizations have to prioritize patient engagement and health outcomes. Patients have become more involved with their own health. Providers must adjust how they engage their target audience to remain relevant and ensure success — in short: They must adapt and lead in a patient-centric approach. According to the Bureau of Labor Statistics, the demand for medical and health services managers is expected to grow by 18% through 2028, a rate much faster than average across all occupations. The Certificate in Healthcare Management was designed to equip students who want to pursue their career in health care industry. This course provides them with inputs about relevant concepts like management of health care institutions, employment of required human capital, leadership and conflict resolution techniques and providing patient centric health care services.

Objectives:

1. The certificate program is intended to provide students with a broad perspective of the topics related to management with emphasis on health care delivery.
2. To keep the students abreast of the latest trends in health care management with topics designed to address contemporary issues in a Health Care Organization.
3. To acquire and practice leadership and managerial skills that will positively affect performance as a healthcare manager.
4. To Evaluate and interpret major themes, issues and trends in global healthcare.
