About the conference:

Higher education institutes in India are making rapid strides of progress and it's time for us to look at India as a globally dominant economy, with a high quality higher education sector that fulfills the needs of society. Despite these strides of progress, India's higher education institutions are not yet the best in the world.

A transformative and innovative approach would be required across all the levers of higher education: from curricula and pedagogy to the use of technology to partnerships, governance and funding. Making rapid progress over the next two decades would require a committed and concerted effort from all stakeholders involved i.e, academia, industry, and Government.

This conference on "Higher Education: Challenges and Opportunities" is a platform for making meaningful deliberations on various issues connected with higher education in India.
